

# aemTEK™ Guidance

automate. engineer. modernise.

Our lead consultant is a Chartered Engineer (Industrial-Mechanical), certified in Lean Six Sigma, who has influenced the design and manufacture of complex products and industrial processes for 10 years. Having implemented solutions with 6-figure profit-adding benefits, the aemTEK™ team can always add value to business operations. The aemTEK™ Services Matrix highlights the major areas of additional services we can offer.

Direct & Indirect  
Costs, Capital  
Expenditure

Process Capability  
and 6 Sigma

Site/Workshop  
Layouts: Material &  
Process Flow

Risk Identification,  
Management and  
Mitigation

Designing for  
Manufacturing and  
Processing (not just for  
the customer!)

Process Mapping and  
QMS Feasibility (ISO  
9001:2015)

In-house  
VS  
Outsource  
Assessments

Customer Demand  
and  
Manufacturing  
Capacity (takt)

Product & Process  
Simplification and  
Standardisation

Manufacturing strategy  
&  
techniques valuation

Lean Manufacturing  
&  
Continuous  
Improvement

Supplier Selection &  
Single Source relief

3D & 2D CAD  
Drafting & GD&T to  
ASME Y14 .5 &  
ISO 1101

App Development &  
Industrial Process  
Streamlining

Engineering (Design,  
Industrial,  
Manufacturing,  
Quality)
